The Scoop

There are a *hole* bunch of reasons why you love golf…the scenery, the challenge, the quiet. Having said that, there's always room for improvement. It might be your swing that's driving a wedge between you and a Nicklaus moment. Well, don't drive yourself crazy over it. Discover the nuances behind your movements with this golf lover's Wowcher. For $79 you'll get a 45-minute video golf swing analysis at Extreme Golf Virtual Golf & Lessons. After you've heard the verdict, you'll get 30 minutes on the golf simulator to work through any kinks on the links. The High Definition Golf™ Simulator uses state-of-the-art technology to provide superior data capture with HDTV projection and surround sound. This 52% off deal won't last forever, so take advantage of it today. How do we know? A little birdie told us.

Got Kids? Not all kid's sports have to be loud. Take them from the putt-putt to the real thing by starting them off the right way. A swing analysis will help them understand the dos and don'ts of golf right off the bat (or should we say, right off the club).

Give your knight in shining armor a day with the court jesters (a.k.a., your children) as you visit the Republic for a bit of R-n-R. Don't worry. The castle will be there when you get back. Maybe.
